\* Divisions for the purpose of election of candidates to council

To ensure the representation of the different specialties in the fields of medicine and surgery and of general practice, the Association's By-law requires that individuals interested in seeking election to council be considered to practice in two Divisions, as follows:

- Division A = Certification from CFPC, or CMQ (Specialists in Family Medicine), or physicians without CFPC or RCPSC certification
- Division B = Specialist certification from RCPSC or CMQ, not including Specialists in Family Medicine

The number of Division A and Division B council representatives has been specified by geographical area; in some instances a council position within a geographical area may be Division A or B.
