7 tips to help you safely recommend mobile health apps in your practice

1. Use trusted apps from reputable sources
2. Know how apps work and keep them up-to-date
3. Consider information security to avoid privacy breaches
4. Obtain, discuss and document patient consent
5. Read disclaimers and know your liability
6. Use a process to manage patient data and health records
7. Be aware of billing requirements in your jurisdiction

For more information and advice for your practice, search “mobile health” on our website.
