Model for Improvement

What are we trying to accomplish?

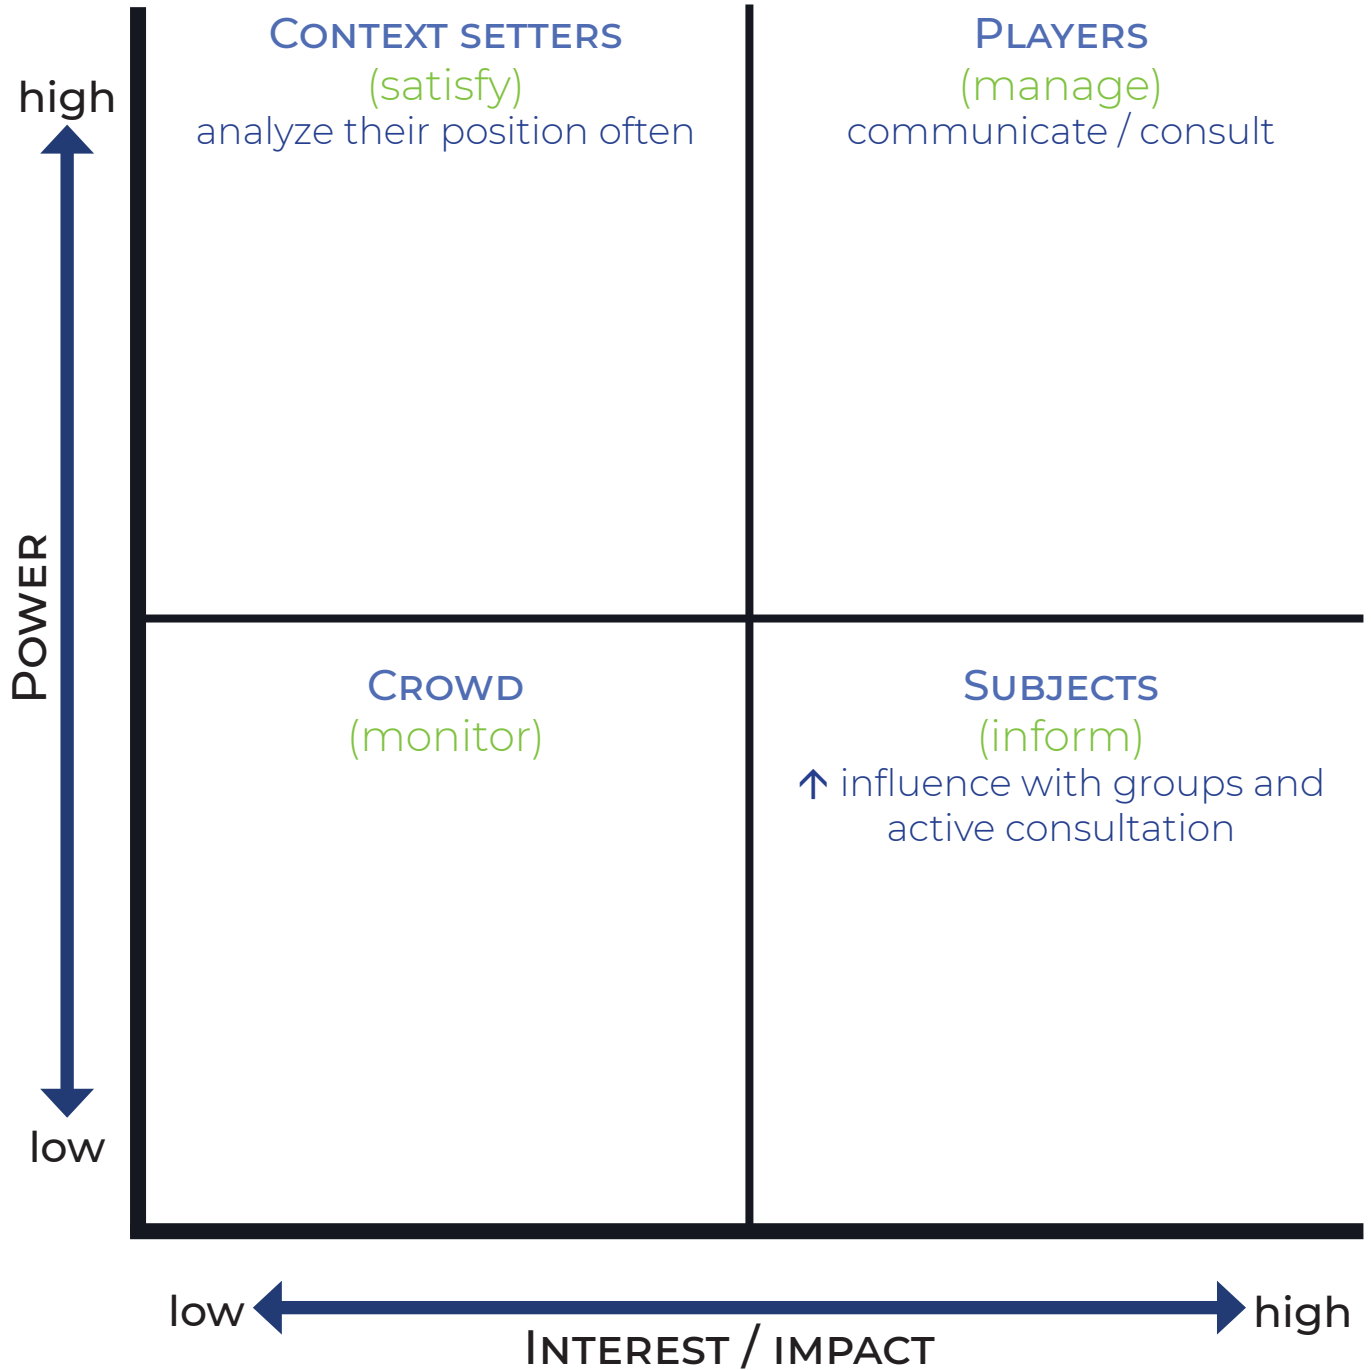

Problem statement: What issue will this project address?

Aim statement: What will improve? By how much? By when? Where? Is this consistent with the priorities / values of your organization?

Scope and boundaries: What will the project include? What will be excluded?

Root causes

Stakeholder analysis

How will we know a change is an improvement?

	Current performance	Goal	Plan to collect data for this measure
Outcome measures			
Process measures			
Balancing measures			

What change can we make that will result in improvement?

Change idea to test:

Initial PDSA cycle: To learn if...

Engagement strategies:

Implementation and scaling strategies:

How will we manage the improvement project?

Roles and responsibilities of team members

When and how will we celebrate success?
